TOOLS BUILT TO LAST

Trick-Tools has the largest selection of hardcore, no-compromise metal fabrication tools and equipment on the planet!

OUR PHILOSOPHY:

We believe that long-lasting, quality tools are not only the best value in the end, but something you can enjoy using that will help you take your fabrication to the next level. The products you see in this catalog are hand picked from top manufacturers around the world. We aren't limited to offering you one tool brand, but choose the best in each category and provide options for the home shop as well as high production manufacturing. Let our Solution Specialists help you determine the best tool for your application. When we help you with a recommendation, we are glad to offer our No Junk Guarantee.

"The bitterness of poor quality is remembered long after the sweetness of low price has faded from memory."

-Aldo Gucci

Here at Trick-Tools we believe that our customers deserve lasting value in their tool and equipment purchases. We are constantly searching for high quality, unique and hard to find tools to offer at the best prices possible. Our commitment to you is that we will not offer "cheap junk" anywhere on our website. You, the customer, help us to evaluate our products constantly and as soon as an ongoing quality issue is uncovered we will correct it or discontinue that product immediately. We hope to earn your continued trust.

COME VISIT US!

We are excited to unveil our new office and showroom! Coupled with our existing warehouse, the new addition

houses a showroom that will showcase a wide variety of hardcore fabrication tools ranging from hand tools for the home hobbyist, all the way to production machines for industrial applications.

Our new showroom is located at 75 Truman Rd, Pella, IA, just 25 miles south of Interstate 80. Our office hours are from 8:00am - 5:00pm CST Monday through Friday. If you're in the area, we invite you to stop by the new showroom to see the tools on display and see how we can help you take your fab shop to the next level!

ORDER TOLL FREE AT 1-877-826-7268 · 8:00 AM-5:00 PM CST · MONDAY-FRIDAY 24 HOUR FAX AT 641-628-2614 · ORDER ONLINE AT WWW.TRICK-TOOLS.COM

Terms: We ship UPS and accept Visa, Mastercard, American Express, Discover, and PayPal. Shipments via common carrier must be prepaid and will be FOB point of origin. No returns without prior approval. No returns after 30 days. Products must be in original package in new/unused condition. Returns must be shipped prepaid. A 15% restocking fee will be applied. Any claims for damage or loss must be filed with carrier by purchaser. Prices and specifications subject to change.

Lease Terms: Posted lease prices are based off of the products pricing at the time of printing and a customers best possible credit score. All posted lease pricing is subject to change and is not a guaranteed price. See website for online application and 30 second approval.

DIGITAL ANGLE GAUGE

- Perfect for finding true bevel angles on a saw and track rotation of a tube when tube bending
- Gauge can be "zeroed" at any point
- Large backlit display
- Features a strong magnetic base

Includes additional battery

· Optional base attaches to round tubing or pipe that is 3/4 inch through 2 inch OD

WR300-T2 Digital Angle Gauge\$29.99 **Tube Rotation Bracket Only** (attaches to 3/4"–2" round tube)......\$59.99

- Critical for projects demanding accurate angle measurements
- Angle Level settles smoothly to the angle due to its oil damped, ball bearing movement
- allowing hands free use on ferrous materials Accurate up to .1 degree

· Features a strong magnetic base

ALB Combo

- Carrying case included
- **Angle Level 3** (1/20°) (5.5" x 5", die cast housing) \$169.95

TUBE ROTATION GAUGE

- Useful in bending and notching to track tube rotation
- Accurate up to 1/10 degree
- The powder coated steel base clamps securely on round tubes
- Great for chassis or exhaust work

- Perfect for large diameter tube bending applications such as exhaust, turbo, and cold air intake systems
- Accurate up to 1°
- Features a 0-360° range and has a capacity of 1-3/4 - 3" OD

976 CC Counter-Clockwise Rotation (Non-Huth bend cards)\$245.00

DWL80E

- The DWL80E is a handy pocket-sized digital level great for hobbyist and professional use.
- Displays degrees and percent of slope
- Made from impact resistant materials and features a magnetic v-groove base for working with round and flat material.
- Range: 0 90° Resolution: 1/10° at 0 and 90° | 1/5° at all other angles
- Accuracy: 1/10°
 Dimensions (LxWxH): 4.25" x .5" x 2"

• Range: 0-90°

• Accuracy: 1/10°

• Resolution: 1/20° at 0 and 90°

1/5° at all other angles

- · Displays in degrees and percent of slope
- Illuminated Display automatically rotates for inverted readings.
- Features an aluminum rail construction and features two bubble levels

DWL680Pro

- Designed for leveling and aligning precision welding tables, milling machines, fixturing, surface grinding, etc.
- Instant single access display measurements of both X or Y axis
- Connect to Smartphone via Digi-Pas Machinist
 +/- 0.004° from 0.5 2° App for remote operation up to approx. 50 feet.
- Accuracy of DWL1300XY: +/- 0.004° from 0 - 0.5° +/- 0.04° from 0.5 - 5°
- Accuracy of DWL1500XY +/- 0.0004° from 0 - 0.5°

DWL-1500XY (0 - 2° range, 1/1000° res).....\$385.00

· Accurate to .1°

 Displays degrees, slope %, and pitch (in/ft) with arrows to show the direction to move towards level

• Gauge can be "zeroed" at any point

• Display inverts when the tool is moved

beyond 90 degrees

• Battery (9 volt) lasts about 400 hours of use

Digital Smart Tool (module only) SALE! \$114.95

RADIUS GAUGES

- Proven to speed up complicated calculations and fabrication of bent materials
- Used in applications such as handrails, spiral staircases, aircraft parts, and much more
- Kit includes two versions of the tool to accurately measure inside and outside radius of a piece
- Invaluable companion to any tube bender or slip roll

ArcMaster Large Radius Kit (6" - 144" Range)		\$229.99
ArcMaster Small Radius Kit (2.5" - 30" Range)	\$129.99

RADIUS CHECK GAUGE

- This robust acrylic radius gauge from Trick-Tools is a valuable addition to any metal shaper's tool box.
- · Great for duplicating contours and assuring consistency in radiused sheet metal parts
- Provisions for 0, .75, 1, 1.25, 1.5, 2, 3, 4, 6, 12, 24, and 36 inch radii
- Invaluable in choosing the proper hammer, dolly, anvil wheel or planishing die to match your part

Trick-Tools Radius Check Gauge \$19.99

ADJUSTABLE RIVET SPACER

- Great for creating artistic patterns for bead rolling, custom furniture, race car, and aircraft fabrication.
- Stainless Steel construction for durability

20 Hole Adjustable Rivet Spacer \$45.00

Use to locate rivet holes in overlapping panels • These handy tools are extremely useful for riveting two

- layers of sheet metal together or when riveting sheet metal to any structure which already has holes drilled in it.
- Insert pilot pin into the existing hole and use the hardened bushing on the opposite strap to guide the drill bit.
- Sold in a 5 piece set, including #40, #30, #21, #10, and 1/4 inch.

13060 Standard Hole Finder Kit, 6 inch	
13062 Inverted Hole Finder Kit, 6 inch	\$29.50

FIND

TRANSFER SCREWS

- Nielsen Transfer Screws align the location of threaded holes with a blank piece of sheet metal or plate.
- Thread self-aligning transfer screw into a threaded hole, place the blank over the punch, and strike with a dead blow hammer.
- The center point of the hole, as well as the diameter of the hole, will be transferred to your blank.
- Made from case hardened steel

- This 4 piece layout template kit includes everything you need to make unique and creative designs when bead rolling sheet metal.
- Each template ensures a perfect arc, circle, straight line, or rivet location.
- Each template is designed to space each profile evenly for a consistent look throughout your project.
- Made from 1/8 inch anodized aluminum with laser engraved markings

Jamey Jordan Series Layout Template Set, 4 piece (includes Arc, Straight, Circle, and Rivet Tool Templates) SALE!\$340.00

BEAD ROLLERS

- Mittler Bros Bead Rollers are designed to handle .040" mild steel (20 ga.), .050 inch aluminum, or up to 16 ga. steel, .060 inch aluminum with industrial motor upgrade.
- Largest selection of heat treated rolls to choose from
- Adjustable depth of bead
- Variable speed foot control allows for hands free operation
- Oilite bushings at all rotation points for long life
- Heat treated gears for years of trouble free operation
- 1-1/8 inch throat height
- Forward and reverse switch for left or right side operation
- Deluxe Kits include: 1/4" round, 1/16" step, spoiler roll, 1/2" flat bead, tipping roll, art pattern roll, and rolling pedestal.

REVERLY THROATLESS SHEARS

• Throatless design lets you turn your work at any angle for straight, curved, and irregular cuts.

- Upper and lower blades are positioned to provide a clean, knurl-free cut, regardless of material thickness.
- Easily cuts mild steel and stainless using tool steel blades
- Drilled for work bench mounting
- SS-2 and SS-3 slitting shears are available for making straight cuts in long sheets of material.

DELUXE KIT

- This Kit offers the same performance that Multitool is known for but offers even more versatility.
- Deluxe kit includes a 90 degree tilting floor pedestal, horizontal work table, and abrasive belt starter kit.
- Backed by a 1-year warranty

- Offers a higher level of performance and convenience, plus greater versatility and durability than any general purpose machine
- Choose from 7 grinding surfaces including 5 radius wheels, slack belt and platen grinding
- Tilts on the side to be used as a bobbin grinder

· Fully sealed bearings RadiusMaster Belt Grinder (add \$900.00 for variable speed option)......\$2,595.00 RadiusMaster Deluxe Kit (includes horizontal platen, rolling base, and belt starter kit) SALE! \$2,895.95 Rolling Base for RadiusMaster.....\$159.95 Drive Wheel Tool Rest for RadiusMaster\$295.95

• Belt speed: 3,600 feet per minute • 1 year manufacturer's warranty

• 1.5 hp, 110v (overload protected)

 Standard equipment includes tilting pedestal, vertical platen, small wheel platen

- Seven different work stations available and can be used in vertical or horizontal configurations
- Micro adjustments for belt tensioning and tracking control are made quickly and easily.
- Optional contact wheels can go up to 10 inch
- 5/16 inch through 2 inch contact wheels are available with optional Small Wheel Attachment
- Includes rotating and tilting pedestal
- 1.5 hp motor, 4,500 RPM
- Infinite variable speed motor
- Belt Dimensions: 2 x 72 inch
- 8 work rests
- Billet aluminum construction

- Hardcore Belt Grinders are precision machines designed and balanced for vibration free operation.
- Micro adjustments for belt tensioning and tracking control are made quickly and easily.
- This premium unit utilizes a billet aluminum construction.

Finance as low as \$137.00 / Month

- 1.5 hp motor, 2,500 RPM
- Variable speed motor
- Dimensions (LxWxH): 21"x 22"x 30"
- Belt Dimensions: 6 x 60 inch
- Quick belt change & tracking

- Hardcore grinders are popular machines among race car fabricators and knife makers.
- Balanced for vibration free operations
- All adjustments are quick and easy with micro adjustments for belt tensioning and tracking.
- 2 x 72 inch belt
- 8 inch contact wheel • Billet aluminum construction
- 1.5 hp motor

BENCHTOP PRESS BRAKE

- Perfect solution for needing to bend small sections of sheet metal and plate steel.
- Its small footprint makes this press a perfect fit for those with limited working space.
- With the optional 4-sided V-die made from 4140 tool steel, tight radius bends can be made in lighter weight materials.
- Uses common 20 ton bottle jack and requires no outside power source
- Ideal for making suspension and body support brackets
- Bottle jack not included

Benchtop Press Brake\$449.95

- A perfect addition to the 20 ton press found in many home workshops or garages.
- Segmented fingers in the top bar can be removed or rearranged to allow bending of restricted areas or on parts that have other bends in them.
- Fingers are segmented in 1, 2, 3, 4, and 9.5 inch pieces with a maximum bending length of 19.25 inches.

STANDARD DUTY CAPACITIES

- 19" in 1/8" mild steel 5" in 3/8" mild steel

PRESS BRAKES

• Atek Press Brakes are pneumatically powered and are available in 2 ft through 10 ft models, with tonnage ratings of 12, 24 and 42 tons. They perform numerous prototyping and production press brake

functions including bending, hemming, box forming, and more. Additional features include adjustable stroke depth control,

adjustable die spacing, tamper proof speed control valve, OSHA lockout, and a variable tonnage control.

PM442 4 ft Press Brake, 42 ton\$21,100.00

N PRESS BRAKE

- This Baileigh Industrial press brake is great for shops of any size.
- Operates on 110 volt power and features a large 42 ton capacity.
- · Hands free foot pedal operation and digital read-outs ensure safety and repeatability.
- Includes Multi-Vee bottom die and upper punch
- Handles bump die tooling with its 2 inch stroke and large 7-3/4 inch open height.
- Mild Steel Capacity: 1/4 inch

BULLSEYE PICKS

- Metal Finishing: Bullseye picks make it easy to accurately repair dents like a professional.
- Return Spring: Allows you to hit quickly, with the advantage of knowing where the pick will strike.
- Designed for use in hard-to-reach areas such as around braces, gussets and other blind areas.

L5" Reach Bullseye Pick	\$119.95
25" Reach Bullseve Pick	\$129.95

CURVE TEMPLATES

- These curve templates are commonly used for duplicating complicated contours ensuring a new part is an exact copy of the old.
- Great for long panels such as hoods, roof skins, fenders, airplane wings, and more

107" Curve Template	\$99.99

HAMMERS AND DOLLIES

- Covell Signature Line Body Hammers and Dolly Blocks are high quality and made in the USA.
- These products were specified by master metalworker Ron Covell and are his favorite designs from over 50 years of metal shaping experience.
- Hammer heads are drop forged from high carbon steel, heat treated, tempered and polished
- The octagonal hickory wooden handles give a well-balanced, substantial feel with excellent grip capabilities.
- They are built to last for years to come in the most demanding environments.

SLAP HAMMER

- This unique tool is designed by, and is the preferred method, of master metal shaper Ron Covell for smoothing lumpy metal
- Perfect for metal finishing steel and aluminum and will leave less marking than traditional hammers.
- The high-density foam grip makes it comfortable to use for extended periods.

Covell Rounding-Over Dies are great for creating a rounded

- or radiused edge on sheet metal panels. Precision machined from heat treated steel, these dies can handle
- up to 16 gauge mild steel. • The built-in back stop allows for a smooth and consistent rolled edge, perfect
- for building tanks and fenders or simply finishing the edge of a part.

ĹŊ

BOSSING MALLETS

- These dead blow bossing mallets become a favorite for rough-shaping sheet metal before wheeling or planishing.
- Each hammer features an ideal profile for metal shaping, a steel rod handle, and a shot canister encased in a hot cast urethane that resists chipping and marking of the surface.

22B ENGLISH WHEEL

- Provides outstanding performance on small jobs like motorcycle tanks, tank covers, seat cowls, and aircraft fillets.
- Use on a bench, clamp in a vise, or use with optional welded stand.
- Capacity of 18 ga. steel and .090 inch soft aluminum
- Throat: 22 inches
- Weight: 80 lbs.

- Anvil yoke has an adjustable axle support so the anvil wheel can be trued to the upper wheel
- Standard working height (from bench): 16-1/2 inches
- Standard working height (with opt stand): 45 inches
- Upper wheel: 8 inch dia. x 2 inch wide 1045 alloy steel billet polished to a high surface finish
- 3.25 inch radius anvil wheel standard
- Made in the U.S.A.

Discovery Kit (includes 22B, 8.50" R, 3.25" R and flat anvil wheels, plus shot bag, mallet, radius gauge and instruction DVD) \$1,049.95

30F ENGLISH WHEEL

- The Metal Ace 30F English Wheel offers metal shaping capabilities for racing, auto restoration, and aircraft rebuilding needs.
- Has enough muscle to form up to 12 gauge steel
- The retractable handle and casters allow for easy portability
- The 3-leg stance gives a solid base on all floors and utilizes a front-mounted rubber pad for stability.
- Anvil yoke is adjustable on both sides of the axle support so the anvil can be trued to the upper wheel
- Features can be rolled into the center of a 60 inch panel
- Quick release cam on lower anvil
- Includes anvil wheel storage rack
- Upper wheel: 8 inch dia. x 3 inch wide 4140HT alloy steel billet, polished to a high surface finish
- Height: 73" Width: 40" Throat: 30" Weight: approx. 340 lbs.
- · Made in the U.S.A.

- The Metal Ace 44F English Wheel offers metal shaping capabilities for racing, auto restoration, and aircraft rebuilding needs.
- Capacity of 16 gauge steel and 1/8 inch soft aluminum
- Anvil yoke is adjustable on both sides of the axle support, so the anvil can be trued to the upper wheel
- Features can be rolled into the center of an 88 inch panel
- Quick release cam on lower anvil
- Includes anvil wheel storage rack
- Upper wheel: 8 inch dia. x 3 inch wide 4140HT alloy steel billet, polished to a high surface finish
- Height: 73" Width: 59" Throat: 44" Weight: approx. 350 lbs.
- Made in the U.S.A.

- Constructed of cast iron and featuring a generous 28 inch throat, the MetalAce 28F Imperial English Wheel works for body panels, motorcycle fenders, aircraft parts and more!
- This tough, small-frame English Wheel provides metal shaping capabilities for any contour, any job.
- Capacity of 16 gauge steel and 1/8 inch soft aluminum

- Quick release cam on lower anvil
- Anvil yoke is adjustable on both sides of the axle support so the anvil can be trued to the upper wheel.
- Standard working height: 48.5 inches
- Upper wheel: 8 inch dia. x 3 inch wide 4140HT steel polished to a high surface finish

• Made in the U.S.A.

(includes 2" wide, 1.00", 2.50", 3.25", 5.0", 8.50" and flat radius, anvil wheels)

- Constructed with a massive cast iron frame and featuring an immense 44 inch throat, the 44F Imperial is the toughest English Wheel you can buy.
- Capacity of 16 gauge steel and 3/16 inch soft aluminum
- Throat: 44 inches
- Quick release cam on lower anvil
- Anvil yoke is adjustable on both sides of the axle support so the anvil can be trued to the upper wheel.
- Weight: approx. 1,850 lbs.
- Standard working height: 48.5 inches
- Upper wheel: 8 inch dia. x 3 inch wide 4140HT steel polished to a high surface
- Rigid cast iron frame provides a sturdy, vibration-free platform for your job
- Screw lift and upper anvil wheel rotate 90 degrees for larger panels
- Made in the U.S.A.

(includes 3" wide, 2.50", 3.75", 6.0", 12.0", 24.0" and flat radius, anvil wheels)

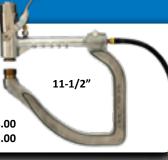

PLANISHING HAMMERS

- · Designed for forming or planishing compound curves in sheet metal.
- Used in many industries including automobile and aircraft restoration, and race car fabrication
- An air control valve allows for fine tuning of power output and an automatic air cutoff switch shuts air off to the motor when the foot pedal is up.
- Includes upper die and 3, 12, and 36 inch radii bottom dies
- Uses CP style tooling
- These hammers are built with uncompromised quality and are completely made in the USA.

- Excellent for auto body work without taking the panel off the vehicle.
- Can be used with or without the yokes.
- Uses CP style tooling

- Includes upper die and 3 lower radius dies: 3R. 12R. and 36R
- Can save hours of time versus traditional hammer and dolly forming.

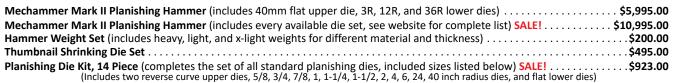

- require constant adjustment for varying material or thickness.
- The unique electric motor and clutch drive system allow for extreme control of power for shaping consistency
- Unlike other traditional planishers, the dies do not clamp the material and gives the operator ultimate control when maneuvering the panel. The dies simply rest on the material while a mechanical interchangeable piston alternately creates positive and negative pressure that moves a pheumatic ram.
- Cushioned hammer blows are automatically adjusted for the thickness of material
- The interchangeable pistons can be exchanged for heavier or lighter impact on the material and an aluminum piston is available for aluminum work.
- Second arm is used for additional clearance below the bottom die when working with tight radius panels
- Die sets are available for a variety of tasks such as planishing, beading, shaping, flanging and tipping. Other specialty anvils are offered as well
 - Variable speed up to 3000 bpm
 - Mild steel capacity: 16 gauge
 - 110v electric motor
- Throat Height: 22 inches • Throat Depth: 20 inches
- Made in the USA

The ProLine Mini-Max does the work of a large and expensive Pullmax machine without taking up valuable shop space.

- Accepts 16mm Pullmax style tooling for shrinking, beading, doming, edge setting, planishing, and more.
- Mild steel capacity: 16 gauge
- Variable Speed
- 1,150 strokes per minute
- Foot control allows for dual hand control
- Includes straight and contour fences
- 1 year warranty

Mini-Max Variable Speed Power Hammer (110v)\$7,500.00 Mini-Max Deluxe Power Hammer (includes rolling stand, thumbnail shrink dies, 110v).............\$8,990.00

- This power hammer by Mittler Bros. is built to replicate a 60 lb Yoder Power Hammer.
- The Mittler Power Hammer utilizes a leather strap & leaf spring to support the upper die assembly which provides a cushioned blow similar to a mallet and shot bag only at a rate of 900 blows per minute.
- The upper die stroke is adjustable to compensate for heavier or more delicate work.
- · Can perform shrinking, stretching, and shaping in sheet metal with a variety of optional die sets.
- The machine also features quick release adjustment handles and a quick change tooling system.
 - Based on a 60 lb Yoder M2 Strokes per Minute: 900
 - Throat Depth: 26 inches Motor: 110v, 1hp

4200-200 Mittler Bros Power Hammer Kit (includes component kit, flat upper die, and your choice of radius be	ottom die) \$3,695.00
4200-150-VS Mittler Bros Single Head Power Hammer (includes flat upper die and your choice of radius botto	m die) \$9,895.00
4200-100 Mittler Bros Dual Head Power Hammer (includes tooling package)	\$16,675.00
4200-600 Optional Tooling Package (includes Shrink, Stretch, Soft, and 4, 6, 12, 24 inch Radius Dies)	\$3,160,00

metal must be formed into a particular shape.

• Can save hours of time versus traditional hammer and dolly forming.

- (1) GL2 Planishing Hammer
- (1) Round Billet (1) Rectangular Shaft
- (2) Planishing Insert
- (1) Swivel Shaft (7) Stretching Inserts (1) Changing Tool (1) Rectangular billet

GL2 Max Planishing Hammer Kit......\$3,116.82

★ KIF B00

 The Handformer series speeds up the shaping process time consuming hammer form work and increasing productivity

• HF 100 PA machine features a pneumatic drive allowing for greater material control, while the stroke and working pressure is controlled with the foot pedal.

 Optional tooling includes shrinking and stretching jaws as well as tools for punching, notching, and edging.

- Head adjusts from 0-15° for comfortable work height
- Mild steel capacity: 1.5mm steel, 2mm aluminum
- Throat depth: 4 inches

Z52 Handpliers (Jaws sold separately, 1mm steel and 1.5mm aluminum capacity, 2 inch throat depth)	\$1,544.18
andformer HF 100 (manually operated)	\$4,820.12
andformer HF 100 PA (HF 100 unit with Pneumatic Drive)	\$7,796.24
neumatic Drive Unit Upgrade for HF 100 (unit only).	\$2.976.12

- The Eckold Kraftformer metal forming machines are powerful, reliable, and precision machines built for decades of use and have huge forming capacities!
- These machines can be used multifunctionally, with optional tooling available for shrinking, stretching doming, flattening, planishing, edging, notching, punching, and straightening.
- Finely tune the forming capacity and stroke frequency for both rough forming and precision work.
- The KF 170 PD has a continuous stroke frequency, however it can be switched to a single stroke for precise correcting and adjusting of parts.
- KF-324 and KF-340 heads adjusts from 0-15° for comfortable work height
- KF-470 and KF-675 are servo motor driven machines designed to work with heavy material up to 6 mm (1/4") and feature an electronic display capable of storing programs for repeatable results.
- Tooling sold separately. Machines FOB Switzerland.

See our website for a complete list of Eckold Tooling

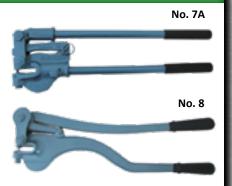

- These hand punches by Roper Whitney can save a lot of time over drilling sheet metal and are much more accurate.
- The 5 Jr punch has a standard 1-3/4" throat depth, while the XX has a deep throat configuration to punch up to 3-1/4" from the edge with up to an 1-3/8" flange.
- 1.2 tons of punching power
- XX kit includes: 5/32", 7/32", 9/32", 11/32", 13/32", 15/32", and 17/32" round punch and die
- Optional bench mount base available
- 5 Jr kit includes: 3/32", 1/8", 5/32", 3/16", 7/32", 1/4", and 9/32" punch and die

5 Jr Hand Punch Kit	\$89.00
5 Jr Bench Mounting Base (not included with kit)	\$33.00
(X Hand Punch Kit	\$280.00
(X Bench Mounting Base (not included with kit)	\$44.00

- These Roper Whitney heavy duty punches are highly portable and will fit any tool chest
- The leverage design of these tools assures easy linear operation.
 - Two hand linear operation
 - Throat Depth: 1.625" • Throat Height: .313"
 - Weight: 17.5 lbs
- No. 7A punch and dies: 1/16" - 7/16"
- No. 8 punch and dies: 1/16" - 1/2"

No. 7A Punch (two hand linear operation)	1.00
No. 8 Punch (5 ton capacity, two hand linear operation)	4.00
No. 8 Mounting Base	4.00
No. 7A and 8 Punch Dies Starting at \$28.00	O ea.

No. 16

- The Roper Whitney bench punches feature a heavy duty steel frame and are designed to be mounted to a sturdy work bench.
- The No. 16 punch is able to deliver up to 7.3 tons of punching power, while the No. 17 punch is able to generate up to 5 tons of pressure, enough to punch a 1/2 inch hole in 1/8 inch mild steel.
- The die shoe on both tools are adjustable to permit the proper alignment of punches and dies for punching thin sheet metal.

No. 16 Punch (7.3 ton capacity, 3.25" throat depth, 1.75" throat height)	\$556.00
No. 17 Punch (5 ton capacity, 6.5" throat depth, 2.125" throat height)	\$669.00
No. 16 and 17 Punch Dies	tarting at \$45.00 ea.

No. 17

- The Roper Whitney rotary style punches produce impressive amounts of punching power.
- The die shoe on both tools are adjustable to permit the proper alignment of punches and dies for punching thin sheet metal.

No. 10 Punch (7.3 ton capacity, 1.5" throat depth, 1.125" throat height)

·

SHEET METAL CUTTERS

- Hougen sheet metal cutters easily outperform standard hole saws by cutting a more accurate hole up to three times faster with far superior tool life.
- These precision ground, heat treated cutters can be used in a hand drill or drill press and will leave a smooth finish with minimal material deformation.
- All sizes can drill up to 1/8 inch thick material and have a "shoulder" to prevent plunge-through.
- Made in the U.S.A

14005 Holcutter Kit (includes 7/8", 1-1/8", 1-3/4", 2" and 2-1/2" w/ arbor, pilot pins, hex washer, and carrying case) \$199.95

TA-CUT HOLE CUTTERS

- Hougen RotaCut Sheet Metal Cutters utilize the same technology as standard cutters but can be used in 3/8 or 1/2 inch chucks and have a maximum depth of cut of 1/2 inch.
- An optional arbor and lower horsepower requirements make these ideal for use in small
- A center punch mark is all that is required to locate and start the spring loaded pilot pin.
- · Made in the U.S.A.

11075 RotaCut Kit (1/4" depth, 5/16", 3/8", 7/16", 1/2" 9/16, 5/8", 3/4" w/ arbor assembly, center punch, and extra pilot pin)......\$87.50 11078 RotaCut Kit (1/2" depth, 7/8", 1", 1-1/8", 1-1/4" 1-3/8, 1-1/2" w/ arbor assembly, center punch, and extra pilot pin)\$218.80

• These drilling jigs and guides are designed to allow the user to drill precise holes in tubing, pipe, and round stock using a portable electric hand drill and/or drill press.

- · Flowdrill exists to provide an inexpensive, high quality replacement for nut-serts or weld-on nuts and bungs when working with thin wall material.
- Flowdrill is a solid tungsten carbide tool, which uses friction to form material into a cylindrical or cone shape.
- This formed hole can then be tapped and used for O2 or EGT sensor installations, brackets and tabs, sheet metal fastening, etc.
- Flowdrill bits can be used in drill presses and milling machines.

	Flowdrill Starter Kit #1 (1/4", 5/16")	\$750.00
!	Flowdrill Starter Kit #2 (10-32, 1/4", 5/16", 3/8")	\$1,025.00
	Flowdrill Starter Kit for O2 Sensors (Hole Sizes: M18 x 1.5")	\$850.00
	Individual sizes (up to 3/4" OD, Up to 20mm)	Starting at \$74.0 0

OW PROFILE MAG DRILL

- The HMD130 Low Profile Mag Drill is a lightweight right angle drill with a large capacity for truck frames and general purpose fabrication.
- Features Hougen's RotaLoc mounting system for use with their RotaLoc Plus Cutters which requires no tools for installation or removal
- Other features include a two stage magnet that engages full power only when motor is turned on, high torque gearing, positive slug ejection, lift detector safety system, and rear mounted controls.
- With a height of 6-11/16", the HMD130 will go places where handheld drills, and other mag drills can't.

Model No.	Motor	No. of Speeds	Spindle Speed	Drilling Capacity	Weight	Spindle Travel	Price
HMD130	115V, 9 Amp	1	450 rpm	1-3/8" - 1"	23.8 lbs	2-1/2"	\$930.00

TWIST DRILLS

- The Thunderbit sets are made in the U.S.A. from high speed steel.
- These bits feature a unique flute design which improves chip ejection and improves coolant flow.
- Each set comes in 1/64th increments ranging from 1/16 1/2 inch and feature a 135° split point.
- Thunderbit TiN drill bits have a Titanium Nitride coating for long lasting performance

Triumph Thunderbit Twist Drill Set, 29 piece (1/16 - 1/2", black & bronze oxide finish)	\$126.00
Triumph Thunderbit Twist Drill Set with 3-Flat Shank, 29 piece (1/16 - 1/2", black & bronze oxide finish)	\$126.00
Triumph Thunderbit Twist Drill Set with 3-Flat Shank, 29 Piece (1/16 - 1/2", black & bronze oxide finish, steel case)	\$121.50
Triumph Thunderbit TiN Coated Twist Drill Set, 29 Piece (1/16 - 1/2", steel case)	\$192.15

9400 DRILL PRESS

- The Ellis drill press is one of the most versatile drill presses available.
- Comes standard with power down-feed, infinitely variable speed operation, instantaneous reverse for tapping, and a T-slotted table and base; its value is unsurpassed.
- This extremely durable drill press features a 4 inch diameter column, 3 inch diameter quill, and a 2 hp motor.

Spindle Speeds	Drills to Center	Drilling Capacity	Tapping Capacity	Morse Taper	Spindle Travel	Spindle to Table (max.)	Spindle to Base	Table	Base

Drill Press Vise (6-1/2" Capacity)	\$300.00
Milling Table (11" Crossfeed, 6-1/2" in/out feed)	\$400.00

DRILL PRESSES

- Dake drill presses are designed for drilling in metal and can be used for a variety of jobs such as tube notching, boring with annular cutters, or forming with our Flowdrill system.
- Variable speed models are powered by a step pulley system or an inverter drive for infinite rpm adjustments.
- The heavy duty column reduces flex while the machined t-slots in the table and base allow for mounting and fixturing for a secure hold on your material.

TB-16V Bench Model Variable Speed Drill Press (110v, Variable Step Pulley)	\$1,595.00

SB-250V Variable Speed Drill Press (220v 3ph, Inverter Drive, Power Down Feed)	\$3,650.00

CIRCULAR COLD SAWS

- Oversized spindle and gear assembly with steel spindle and bronze gear
- Additional ball bearing support of hardened and ground spindle shaft to prevent failure.
- Cam activated vise with gib adjustment and anti-burr arm
- Reliable mechanical coolant pump with flow control adjustment

• 315 & 350 models feature 24v control circuit, E-stop switch, low voltage and thermal

- protection, and optional pneumatic vise.
 350 model features an adjustable safety clutch to eliminate blade breakage.
- All the Dake saws come with a pedestal, blade, tool kit, coolant, adjustable stop, and service manual.
- 1 year manufacturer's warranty

CIRCULAR COLD SAWS

- Scotchman Cold Saws provide clean, straight, burr-free cuts, easy miter cuts, and safe operation without sparks or heat.
- Head rotates 45 degrees right and left for miter cutting
- Slotting operations can be performed with a head that will rotate up to 90 degrees.
- Miter locking pins at 45 degrees left and right provide fast angle selection
- 7 gallon coolant tank with pump
- Emergency stop button is equipped for operator safety.

- These rugged machines are made to last with hardened and ground bronze gears to provide years of trouble-free service.
- PKPD Series features an air-operated clamp for material vise
- PKPD Series utilizes a pneumatic power down feed with electric controls
- PKPD Series uses separate feed controls for rate and pressure
- 3 year manufacturer's warranty

CT CIRCULAR SAWS

• The Evolution line of saws covers many applications from thin sheet metal to 1/2 inch thick plate!

- Cuts tubing, angle iron, metal grating, channel, roofing, fencing, frames and more.
- Much cleaner, faster, and safer than torches, portabands and other methods.
- The Evolution saw line offers two sizes of machines that are covered by a three-year manufacturer's warranty
- Clean cutting, collects virtually all chips and sparks
- Lightweight, only 12 or 20 lbs, depending on model
- Cutting depth up to 2-1/2" or 3-1/4", depending on model
- Spindle lock for fast easy blade changes
- Dry cutting for minimal clean up
- Sturdy carrying case
- Overload switch
- Laser guide on EVOSAW230

PORTABLE BAND SAW

- Perfect for the hobbyist needing a lightweight portable saw with large cutting capacity
- Two speed control aids cutting both ferrous and non-ferrous metals
- 45 degree swiveling miter head makes miter cuts a breeze
- Features a powerful 1hp, 110v motor
- Adjustable front band guide
- Optional table for vertical use

Vertical Work Table\$144.00

MITERING HEAD BAND SAW Perfect for the hobbyist needing a lightweight • Reverse blade rotation results in up to portable saw with large cutting capacity

- Variable speed control aids cutting both
- ferrous and non-ferrous metals
- Cast construction allows for years of use
- 60% faster cuts than similar saws of this size
- ABS models feature a unique gravity down feed system that allows for hands free cutting.

MITERING HEAD BAND SAW

- This mitering head band saw is excellent for the industrial user needing accurate cuts and large capacity (6-7/8 inch capacity).
- · The heavy duty cast iron and steel construction equates to a very durable cutting platform.
- Coolant system keeps blade and material cool during the cutting process
- Head rotates up to 60 degrees for almost any miter cut and features a hydraulic downfeed control.
- An adjustable length stop is included for repeatable cuts

- Carif Saws are dual mitering, semi-automatic band saws for industrial use.
- Its patented hydraulic system operates the vise, feed rate, and cutting pressure.
- The mitering head rotates 45° in both directions, and 60° to the left.
- Flood Coolant System with 13 gal. tank
- Bow height stop for repeatable cutting
- Parts Counter available on 320BSA model Material depth stop.

BENDING SOFTWARE

- Bend-Tech offers tube bending software solutions for everyone from the hobbyist to the professional fabricator.
- Using the finished part dimensions, this software calculates how long to cut your tube as well as where to start each bend regardless of your bender type, saving you hours of calculating and reduce wasted material.
- Each version contains several common templates for nearly any application.
- With Bend-Tech SE, users have the option of sketch mode for drawing custom parts as well as X, Y, Z dimensional input.
- You can even view and rotate a three dimensional model of the finished part and watch a simulation of how it will bend on your specific bender.

TRICK-TOOLS HAND BENDER

- The HB1 features heavy duty steel construction for bending custom fuel, brake or hydraulic lines or even small diameter chassis tubing up to 5/8 inch OD.
- Quick setup and simple operation make this bender the right choice for light production, repair,
- Each standard die set is reversible for bending three-times or five-times the diameter of the tube radii and the adjustable bend die allows for easy repositioning and removal of the tube.
 - Rugged CNC machined steel construction
 - Replaceable parts for long service life
 - 3D and 5D bends from each die set
 - · Adjustable bend die on lead screw
- Close bend-to-bend distances
- Simple set up and operation
- · Pedestal or vice mount

PRU-TUBE BENDERS

 Pro-Tools Model 105HD Tube Bender features 5/8 inch thick main frame arm and easily bends up to 2 inch OD material by hand.

• Graphite impregnated bushings in the ratchet handle and steel bushings at the main die pivot to reduce friction and eliminate wear.

• Dies are sold separately and available for round and square tubing and nominal pipe sizes (NPS).

BRUTE BENDER

- The Pro-Tools BRUTE Hydraulic Tubing Bender is a seriously heavy duty machine for race car chassis, roll bars, handrails and a lot more.
- With its 2-1/2 inch OD x .188 inch wall thickness tube or 2 inch schedule 80 pipe capacity, the BRUTE can handle almost any job.
- Steel bushings at the main die pivot to reduce friction and eliminate wear
- Features include a 15 ton hydraulic cylinder with a 16 inch stroke, 1 inch thick main bending frame with integrated CNC machined degree ring.
- Dies are sold separately

Pro-Tools BRUTE Hydraulic Tubing Bender Deluxe Kit (includes bender, rolling pedestal, air/hydraulic pump) SALE!......\$2,488.85 Pro-Tools BRUTE Hydraulic Tubing Bender Deluxe Kit (includes bender, rolling pedestal, electric/hydraulic pump) SALE! \$3,053.85

- The RDB-175 tube and pipe bender features a new programmable bend interface, foot pedal controls, quick tooling changes and a large 2-1/2 inch OD bending capacity.
- The RDB-175 is very fast; with a unique dual hydraulic ram design it can make 180 degree bends in as little as 12 seconds.
- With tooling available for round, pipe, and square materials the RDB-175 is one of the most flexible, fast, and repeatable benders on the market today.
- It also features a quick release counter-bend die for easy positioning/removal of the tubing.
- No tooling required to change forming and pressure dies
- 2-1/2" round .125" wall mild steel capacity 2" round .120" wall chrome moly capacity
- 2" schedule 40 pipe capacity • 9" CLR maximum
- 2" square .125" wall mild steel capacity
 - 110v

BAILEIGH

RDB-250 TÜBE BENDER

- The RDB-250 tubing bender is a programmable control machine that allows up to 170 programs with 10 bends per program.
- All bend data, including bend angle, speed, and quantities, as well as length and rotational stops can be stored in the memory.
- Optional indexing tables give repeatability for both rotation points and length measurements between bends.
- This rotary draw tube bender can bend at speeds up to 9 seconds for a 180 degree bend and can be programmed to bend up to 360 degrees, great for solid rod applications.
- The counter die positioner has a numerical counter so repositioning of the counter die is a breeze when recalling bend programs.

RDB-250 Bender (220v 1ph)......\$11,795.00

Index Table for RDB-250 Tubing Bender (10 ft table) \$4,095.00

- Dies are sold separately and available for round and square tubing well as nominal pipe sizes.
- Made in the U.S.A.
- 2" schedule 40 pipe capacity
- 2" square .125" wall mild steel capacity On casters for portability
- 9" CLR maximum
- Optional positioning table
- 2-1/2" OD .125" wall mild steel capacity No tools required for die changes
 - Bends pipe, round & square tubing

 - 220v 1ph

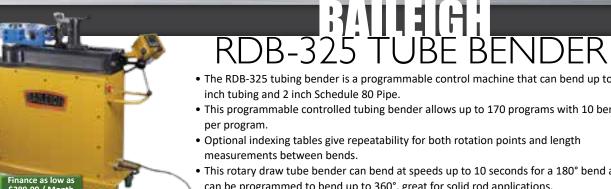

- 3" OD .095" wall mild steel capacity
- 2" schedule 80 pipe capacity
- 2" square .188" wall mild steel capacity
- 16.5" CLR maximum
- Optional positioning table

 \bullet The RDB-325 tubing bender is a programmable control machine that can bend up to 3 inch tubing and 2 inch Schedule 80 Pipe.

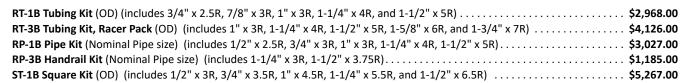

• This programmable controlled tubing bender allows up to 170 programs with 10 bends

- Optional indexing tables give repeatability for both rotation points and length
- This rotary draw tube bender can bend at speeds up to 10 seconds for a 180° bend and can be programmed to bend up to 360°, great for solid rod applications.
- The counter die positioner has a numerical counter so repositioning of the counter die is a breeze when recalling bend programs.
- Dies are sold separately and available for round and square tubing well as nominal pipe sizes (NPS).
- No tools required for die changes
- Bends pipe, round & square tubing
- On casters for portability
- 220v 1 ph

BENDER DIE PACKAGES

- These Baileigh die packages will help you save money and get you underway on your next bending project.
- These kits are put together for specific projects ranging from handrails to chassis fabrication and are available for bending round, square, and pipe.
- Baileigh dies can be used to bend the specified size in mild steel, stainless steel, DOM, 4130 chrome moly and more.
- Die kits will fit all Baileigh tube benders except the RDB-050.

- dies available for round and square tubing, round pipe, flat stock, and more!
- Delrin dies are also available for aluminum, copper, brass, and chrome finishes to reduce abrasion or scratches on the material.
- Bender frame is made from 1/4-inch thick plate and the axles are 4340 heat-treated Chromoly
- A digital readout gauge is included for part consistency and repeatability
- Uses 2-ton bottle jack for roll adjustment
 - Mild Steel Capacity: 2-1/2" x .120"
 - Nominal PIPE Capacity: 2" Schedule 40
- Minimum OD: 1/4" • Max Degree of Bend: 360°
- Square Mild Steel Capacity: 2" x .125"

Roll Sets Starting at \$169.95 ea.

POWERED ROLL BENDERS

- A digital read out allows repeatability for production runs and machines come complete with a universal roll set allowing you to build the correct size die for your material.
- Tube sizes require specific rolls for each OD and we have rolls for any application including CNC controlled. Please call for special applications.
- These benders are great for handrail applications, race car bumpers, and ornamental iron work.
- Lower rolls knurled for optimal traction
- Manual or hydraulic adjustment of top roll
- Rugged frame and heavy duty wide base
- Hardened steel shafts
- Horizontal or vertical operation options
- Drive components supported in roller bearings
- Heavy duty adjustable lateral material guides
- Compact, low maintenance design
- Hardened universal standard rolls
- Motor overload protection

XHAUST BENDERS

- Huth benders provide a fast and versatile option for ram bending tubing, pipe and square and are popular with exhaust shops, as well as industrial applications.
- The HB-10 is Huth's entry level bender, designed to introduce you to Huth quality while showing you incredible profit potential with its standard features.
- Included in the HB-10 package is the model 1600 bender, and tooling for bending and creating joints for exhaust tubing from 1-1/2 to 3 inch OD.
- Not only is this machine capable of bending up to 3 inch OD material, but it can also expand and reduce tubing, and form exhaust ball joints and slip joints.
 - 220v, 1ph or 3ph power options Industrial quality
 - Available tooling packages
- Expander/Swager included
- The Huth 2600 industrial duty bender is the most powerful bender of its kind and is designed for large diameter or heavy wall applications that cannot be done on conventional machines.
- It offers a knee pedal control, 7.5 hp unit enough to provide 85,000 lbs of bending force, and a compact control panel.

HB10 Bender with tooling package SALE!	\$9,995.68
2600HD Industrial Bender, less tooling	\$11,614.85

• Great for structures such as carports, green houses or picnic tables and is versatile enough to bend round tubing, square or rectangle as well as flat bar

 The Smart Automatic Mode features an adjustable return-to-home position control along with a precise and easy to read depth of bend gauge that increases efficiency and ensures fast and easy transitions between multiple bends.

TRANSILIII MANDREL BENDERS

- The German made K Series mandrel benders are the highest quality design and built with space and portability in mind.
- These machines offer hydraulic muscle with digital accuracy, offering a tolerance of +/- .1 degree.
- With capacity up to 4 inch stainless and bend radii as tight as 1.5 x diameter in their standard configuration, these machines are as versatile as they are economical.
- Optional accessories include mandrel lubrication, length and rotational stops with the plane of bend device, and 500 part storage with the SPS touch screen control. Please call our expert sales staff with all of your bending needs.

DB 2076K

- Bends up to 3" OD x .109" wall thickness mild steel tubing
- Stainless steel tubing up to 3" OD x .065" wall thickness
- Bending angle up to 180.0 degrees plus 10.0 degrees of springback
- Bending head speed 0.0–90.0: 8 seconds
- Standard load length: 10 feet (extensions available)
- Minimum centerline radius: 1.5D

- Maximum centerline radius: 6 inches (extensions available)
- Manual or semi-automatic operation (with optional SPS control)
- Includes boosted pressure die and controlled mandrel withdrawal
- Machine weight: approx. 2,200 lbs
- Great for automotive exhaust and headers Prices start at \$69,300.00

DB 20101K

- Bends up to 4" OD x 0.134" wall thickness mild steel tubing
- Stainless steel tubing up to 4" x .078" wall thickness
- Bending angle up to 180.0 degrees plus 10.0 degrees of springback
- Bending head speed: 0.0-90.0: 9 seconds
- Standard load length: 10 feet
- Minimum centerline radius: 1.5D (optional boosted pressure die for <1.5D)
- Maximum centerline radius: 7 inches
- Manual or semi-automatic operation (with optional SPS control)
- Removable shaft for small bend radius
- Machine weight: approx. 5,500 lbs.

Prices start at \$111,500.00

DB 2060-3A-CNC

- Stainless steel tubing up to 2-3/8" x .120" wall thickness
- Bending angle up to 180.0 degrees plus 10.0 degrees of springback
- Bending head speed: 35° per second
- Standard load length: 15 feet
- Minimum centerline radius: 1.5D
- Maximum centerline radius: 6 inches
- Machine weight: approx. 11,500 lbs. Prices start at \$179,000.00

Finance as low as \$126.00 / Month EXPANDER/SWAGER

- Tubing expanding capacity is from 1 inch up to 5-1/2 inch ID
- Tube swaging, reducing, and flaring capacity is up to 3 inch OD
- Includes collet holder for 1 inch up to 2-1/2 inch OD tubing, and adjustable collar for expanding 1 inch to 3-1/2 inch tube
- Powerful 5 hp motor, 240v 1ph (30 amp), or 3ph (20 amp)
- Portable design includes heavy duty wheels and front swivel caster with brake
- Great for end forming mild steel, aluminum, stainless steel, black pipe, and tubing
- This tubing expander / steel pipe reducer has 25,000 lbs. of expanding power • Automatic preset expanding system allows precise expanding every time
- Made in the U.S.A.

MITEY MATE IR.

- The Mitey Mate Jr is an air powered offspring of Huth's larger 1673 expanding unit.
- Operates off 80-120 psi of shop air and will produce 17,000 lbs of expanding force.
- Expanding tubing is easy with Huth's Accu-Sizer system, for perfect expansions every time. Includes tooling to expand 1-1/2 inch to 3 inch .065 inch tubing.

BALLE (FL) TUBING NOTCHER

- The TN-250 tubing notcher is one of the most versatile hole saw notchers on the market today.
- The unique radial vise clamping system allows for clamping tubing from 1 to 2-1/2 inch OD in any location, including the center of a bend.
- Hole saws are supported on a massive 1-1/4 inch OD shaft, which also includes a replaceable hex insert for attaching to a standard 1/2 inch drive drill.
- Sealed needle bearing shaft supports allow for smooth operation
- 1 inch offset notches can be performed by raising or lowering the cutter assembly.
- Bolt or clamp it to a table or simply clamp it in a vise
- 230 degree of angle adjustment

TUBING NOTCHER

- Built around a heavy duty 1/2 inch thick aluminum base plate with a 1 inch diameter shaft supported on sealed ball bearings, this is one heavy-duty notcher!
- This Pro-Tools notcher will handle 3/4 inch through 2 inch diameter tubing at angles up to 60 degrees and uses regular bi-metal hole saws.
- The HSN-501i can be used in a drill press or attached to a table and used with a standard 1/2 inch drive hand drill.
- This tube and pipe notcher also has an adjustable vise for offset notches.

HSN-501i Hole Saw Tube Notcher \$274.95

TUBING NOTCHER

- The Baileigh TN-300 tubing notcher is an industrial-quality hole saw coping machine.
- Vise allows for offset coping up to 1-1/2 inches and features a quick release taper lock system for easy adjustment of the cut angle.
- Capable of notching 3/4 inch through 3 inch tubing with a maximum notch angle of 60 degrees
- With a 110 volt, .5 hp motor, and oil filled gearbox, this rugged combo is built for

TUBING NOTCHER

- Create perfect weld joints in chrome moly, mild steel, stainless steel, and aluminum pipe or tubing with outside diameters of 1 to 3 inch.
- Does not contaminate the weld joint, offering more strength in the weld.
- With unmatched versatility and mobility, the TN-800 pipe notcher is capable of notching up to 60 degrees in either direction.
- Cross slide table, angle vise, and V-Jaws can be independently calibrated allowing accurate positioning of straight, angled, or offset notches.
- Quick changeover for different diameters of tube
- · Ruggedly built stand with large wheels and casters allows for easy mobility.

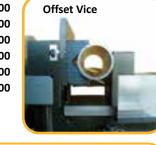

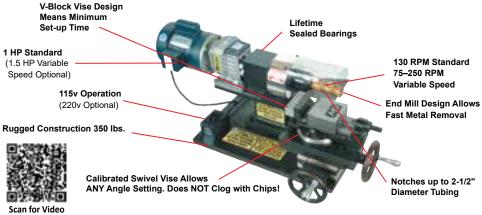

TUBING NOTCHER Finance as low as \$116.00 / Month

- The MB Ultimate Tubing Notcher has been a favorite in fabrication shops for many years.
- Operation is simple; just clamp your tube in the calibrated swivel vise that allows for accurate and repeatable positioning at any angle and a compound feed table advances tubing into the milling cutter, producing a perfect notch and a perfect fit—every time.
- Extreme angles can be achieved because of the swiveling vise and the finished notch requires very little cleanup or deburring.

Double Sided Variable Speed Ultimate Tubing Notcher (max capacity 3/4" to 2" tubing, 110v) . . . \$6,575.00 Offset Vise Option (allows offset notching of tubes) \$345.00 Ultimate Tubing Notcher Stand (cabinet provides space for safe storage of spare cutters) \$395.00 (See website for cutter pricing)

GX ABRASIVE SYSTEM

- The Grit GX75 Dual Speed Belt Grinder is the basis for the GX module system.
- Featuring a 3 x 79 inch belt, 3 x 16.5 inch grinding surface, and an 8 inch front contact wheel, this grinder offers plenty of grinding space for almost any application.
- Additional modules include abrasive tube notching and centerless grinding

GRIT MODULES

- The Grit GXR radius grinding module is the perfect solution for tube and pipe notching from 5/8 to 3 inches.
- Convert from grinding to notching within minutes (requires 3" x 88-1/2" belt length)
- Standard features include a quick clamping system, traverse carriage, indexed degree table, and depth stop.

- The Grit GXC Centerless Grinding System by Fein can create the perfect surface finish on round tubing, with a very simple operation.
- The GXC features high process speeds along with an infinitely adjustable feed
- A variety of abrasives are available in order to achieve the right finish whether you are removing mill scale or creating a satin finish on stainless handrail.
- Two types of rail guides are included, brass for rough surfaces, and nylon for more delicate finishes.

GI ABRASIVE SYSTEM

- The Grit GI150 is the ultimate workhorse for your industrial grinding needs.
- Featuring a 6 x 79 inch belt, 6 x 18 inch grinding surface, and an 8 inch front contact wheel, this grinder offers plenty of grinding space for almost any application.
- Additional modules include abrasive tube notching and centerless grinding
 - Belt Speed: Single Speed = 7400 SFPM
- 5hp motor
- Belt Speed: Two Speed = 3700 / 7400 SFPM
- RPM: 1730 / 3450

GRIT MODULES

- The Grit GIR radius grinding module is the perfect solution for tube and pipe notching from 3/4 to 6 inches.
- Convert from grinding to notching within minutes (requires 6 x 89" belt length)
- Standard features include a quick clamping system, traverse carriage, indexed degree table, and depth stop.

- The Grit GIC Centerless Grinding System by Fein can create the perfect surface finish on round tubing, with a very simple operation.
- The GIC features high process speeds along with an infinitely adjustable feed rate of the material from 0 to 6.5 ft/min.
- A variety of abrasives are available in order to achieve the right finish whethe you are removing mill scale or creating a satin finish on stainless handrail.
- Two types of rail guides are included, brass for rough surfaces, and nylon for more delicate finishes.

BENDELLING SYSTEM

SOFTWARE

Bend-Tech INDUSTRIAL: Has the ability to work with your 3D solid model CAD designs. Also includes several tubing designers including our easy-to-use assembly designer.

Bend-Tech Dragon Software: An automated CAM product that understands tubing and will automatically create your cutting, marking and etching paths directly from Bend-Tech Industrial. Bend-Tech Dragon software comes with a nesting ability to allow several parts on the same stock tube.

A400 MACHINE SPECS

Machine Length:

12 ft and 24 ft options available

(144" / 294" of travel in 1 position / unlimited when re-positioned)

Round: 0.50" - 6" Diameter (up to 2" using pass through chuck) Square: 0.50" - 4.0"

Rectangle: 0.50" to 4.0" width x 0.50" to 4.0" height Tube Weight: 400 lbs maximum

Speed of Cutting:

Varies by material. Ranges from 45"- 90" per minute. (Rapid Travel: 1500 inches per minute)

• Bend-Tech Dragon is a complete solution for tube cutting, etching, and marking combined with the world's most powerful software for tube design and manufacturing.

- Dragon has capabilities of plasma cutting end profiles, holes, and contours in round tubing.
- · Bend-Tech Dragon will also mark or etch your bending information; including bend angle labeling, bend location line-up marking, and weldment fit-up locations.
- A pass through chuck feeds the tubing and allows for pieces that are longer than the machine to be manufactured.
- The support yoke is designed to guide the tubing even if the material stock is not perfectly straight.
- The easy to understand control panel is built with LED lights to tell the operator exactly what the machine is doing and is designed for the most novice of machine operators.
- Windows PC is required and is sold separately. This system will not operate on Apple (IOS) platform.
- An optional Technology Package Accessory is available and includes computer, preloaded software, computer cabinet, and more!
- An optional Water System is available to increase cut quality, reduce slag, keep material cooler, and extend torch consumable life.

Plasma cutting: Cuts end profiles, holes, and other contours.

Tool changer: Machine will switch between marker/etcher/ plasma/laser pointer automatically depending on your intended

Tube marking/etching: Bend-Tech Dragon obtains the bending information from the Bend-Tech Industrial software to automatically mark and etch bend angle labels, bend locations and

FE MODELING BLOCKS

- Makes quick work of designing full exhaust systems, cat back systems, intercooler or turbo downpipe assemblies, and cold air intakes.
- FE Series kits work similarly to the header blocks by simply snapping together with the ability to rotate and create the exact radius necessary for your design.
- Blocks come in straight and curved blocks in a variety of center line radii and 15 degree sections.
- Each block features index points to aid in block rotation and obtaining the perfect radius.
- Once a design is made, metal parts can be cut and welded to replicate your model.

- The 48 x 30 inch Rhino Mobile Fixturing Station is unlike any welding cart on the market!
- Features a nitrided BuildPro welding tabletop and accepts all BuildPro accessories.
- Tabletop also features a black oxide finish and is reversible if one side is damaged.
- Comes complete with a 66 piece fixturing kit, heavy duty casters, and leveling feet.
- Rhino Cart provides plenty of storage for welding fixtures, clamps, and welding supplies.
 - Table Height: 36 inches tall
- Hole Spacing: 2.000 +/- .0015
- Hole Diameter: .625 +/-.002 inch Plate Thickness: .625 inch

StrongHand Rhino Cart Mobile Fixturing Station SALE! \$2,595.00 (Deluxe Kit includes Stainless Steel Table Cover, Fold-down Plasma Cutting Tray, and Grinder / Vise Receiver Mount)

Included Fixturing Kit Components:

- (10) T55055 Adjustable Lock Bolts (2) T54201 Locating Pins
- (2) PTT522K 2.3 inch Inserta Pliers (2) TCX5210 Side Clamps
- (4) T54205 2 inch Locate Stops (2) PTT634K 4 inch Inserta Pliers
- (2) UDN5150 Inserta Clamps
- (2) T54217 Inserta Clamp V-Pads (8) T54216 V-Blocks
 - (4) T54211 V-Block Spacers
 - (8) T50632-01 D-Stop Bars
- (4) T54203 1.5 inch Locate Stops (12) T50737 Magnetic Rest Spacers
 - (2) T50304 2 inch Angle Brackets
 - (4) T50305 4 inch Angle Brackets

FIXTURING TABLES

- · Features a modular design that allows the precision ground and CNC machined top plates to be reconfigured to extend the width of the table for larger projects.
- Table is easy to set-up and tear down, saving valuable workspace.
- · Heavy duty leveling feet

- Hole diameters: .625 inches
- 1-3/4" spacing between plates
- Hole spacing: 2.00 inches
- Table flati

• Table flatness: .004 Incn/ft	Plate thickness: .625 inches	
47" x 38" Standard Table (add \$551	25 for Nitrided Table)	 \$2,315.25

BUILDPRO MAX TABLES

- MAX tables feature a continuous plate tabletop surface with 33% more machined holes than the standard slotted tables, for a maximized work surface.
- Just like the standard BuildPro tables, the MAX series features a modular design, allowing the plates to adapt to your project no matter the size.
- Heavy duty leveling feet
- Hole diameter: .625 inches
- · Continuous plate design
- Hole spacing: 2.00 inches
- Plate thickness: .625 inches • Table flatness: .004 inch/ft

94" x 48" BuildPro MAX Standard Table (add \$945.00 for Nitrided Table) \$5,145.00

System 28 Table

- These German constructed tables feature five fixturing surfaces constructed from 1 inch (25mm) thick plate with additional reinforcement underneath the work surface.
- Fixture mounting holes are CNC machined to 28mm diameter, spaced 100mm apart, and have a flatness rating of +/- .0025 inches per foot.
- These tables are constructed from a hardened steel before going through a plasma nitride treatment to achieve a hardness rating of over 750 Vickers (HV) (60.5 Rockwell)
- A wide variety of fixturing components are available.
- See our website for accessory and leg options

There is likely no piece of equipment in a shop that sees more use than the workbench, so why not have a Badass Workbench that is guaranteed not to let you down? Badass Workbenches are made in the USA and carry a lifetime warranty! They are built to last and feature extreme-duty construction unlike anything available on the market today. Whether welding, grinding, cutting, or hammering, we know that your work is demanding and you deserve a workbench that can hold up to the kind of abuse that you can dish out.

- Badass Workbenches are available in 3-bay, 2-bay, and single drawer models and stand 37.5 inches tall x 32 inches deep.
- Standard top is 3/8 inch thick and comes with a 3-inch tall backsplash
- The heavy-duty frame is built from 4-inch square tubing and has a maximum capacity of 4800 lbs.
- Table comes standard with leveling feet, however optional heavy-duty rolling casters, rated at 1200 lbs each, are available.

- · Built into the heavy-duty 4-inch square frame are 8 swivel opening drawers with magnetic closures with a 450 lb capacity each!
- The patented drawer hinge design features a 1-inch solid steel hinge rod, with grease fittings for each drawer, meant for a lifetime of service.
- Optional drawer divider kits are available for increased drawer organization

Available **Drawer Options:**

- 3-inch deep x 24-inch wide
- 6-inch deep x 24-inch wide
- 9-inch deep x 24-inch wide
- Power drawer/cabinet

- Receiver mounts are fitted at the end of the workbench and accept the Versa-Mount line of tool mounts to keep your tabletop surface free of clutter.
- Mount a grinder, bench vise, Beverly Shear, Roper Whitney punch, or any number of tools when you need them, and remove them when you don't.
- Looking for a customized workbench? See below for a few customizable options and call one of our Solution Specialists for pricing!

Customizable Options:

- Choose from a variety of tabletop thicknesses
- More than 20 drawer layout options
- Steel pegboard with hooks
- More than 100 color configurations
- Keyed Locks
- Lock Bar

- Casters
- Drawer Dividers
- Slide-in Vise or Versa-Mount

3BAYSD Single Drawer Workbench, 8ft (includes (2) 3-inch, (2) 6-inch, wire mesh bottom shelf, and receiver mount)......\$3,550.00 2BAYSD Single Drawer Workbench, 6ft (includes (2) 3-inch, (1) 6-inch, wire mesh bottom shelf, and (2) receiver mounts) \$3,100.00

FABRICATION TABLES

- Badass Welding & Fabrication Tables are rock-solid and built with durability in mind.
- These tables feature a 1/2 inch thick steel top, beefy 4x4 legs, heavy duty welded frame, and a storage rack underneath.
- The two built-in receivers (4 on select models) accept the Versa-Mount tool mounting system to free up valuable tabletop and floor space.
- Standard tables come equipped with leveling feet, however optional heavy-duty casters, rated at 1200 lbs each, are available.
- Each table stands 36" tall and features a 4800 lb capacity.
- Call our Solution Specialists for customization options and pricing.

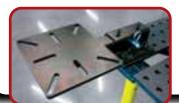

48" x 36" Welding and Fabrication Table (includes (4) tool receiver mounts, add \$200.00 for Casters)	\$1,700.00
72" x 36" Welding and Fabrication Table (includes (4) tool receiver mounts, add \$200.00 for Casters)	\$1,900.00

96" x 48" Welding and Fabrication Table (includes (2) tool receiver mounts, add \$200.00 for Casters)	\$2,200.00

VISE & GRINDER MOUNT

- Keeps work surface clear and eliminates the need for dedicated machine stands
- The table mount can be attached above or below your workbench or StrongHand Table/Rhino Cart, while the wall mount can be fitted to any vertical surface.
- Receivers include four jam bolts to produce a rock-solid fit for the tool mount
- Tool mount is constructed from 2 x 2, 3/16 inch wall square tubing, while the steel mounting plate is 3/8" thick and measures 8.5 x 9.5 inches
- Mounting plate features both 90 and 120 degree slots to accommodate a wide variety of tools, or you can drill your own holes as needed.

SWIVELING PLATES & RECEIVERS

• The swiveling Universal Plate with Receiver Mount is great for mounting tools close at hand and free up bench or floor space

• The swiveling BuildPro Fixture Plate with Receiver Mount is a great way to fixture small parts and rotate for ease of welding.

The swiveling Vise and Grinder Plate allows for repositioning tools to any desired angle

• Table mount receiver bolts directly on to StrongHand BuildPro Tables or Rhino Cart, but can also be mounted above, or below, any workbench.

ABLE TOP FIXTURE PLATE

- Use this fixture plate with the included riser blocks to fixture small parts where it is most convenient for you.
- Weighing a hefty 25 lbs and measuring 20 inches long x 6-1/4 inches wide, the 5/8 inch thick top plate features 30 fixturing holes in a 2 inch center to center pattern.
- The included riser blocks and hardware raise the plate 1-1/2 inches above the table surface and allow multiple plates to be linked together in any configuration.
- Riser blocks also serve as a great way to secure the fixture plate in a bench vise
