

Roller Conveyors

Roll-In Saw offers a heavy-duty line of roller conveyors compatible with all Roll-In Saw models—and any other material handling needs. Like the rest of Roll-In Saw's products, these American-Made conveyors are durable, versatile, and offered at a great price.

The conveyors help you load long and heavy pieces of materials and work for various applications. All 4 legs are easily adjusted to ensure a square surface regardless of the levelness of the floor. The two different height ranges and 2 different lengths will make it easy to pair your conveyor with your particular cutting needs.
