

Strong Arm 5 Portable Drill Press

The Strong Arm 5 portable drill press fits most electric drills that have a clamp on anti-torque handle. The Strong Arm 5 will mount on the drills torque control handle band if it is from 1.64" to 1.73" OD. The two drill brands with a consistent dimension that work with the Strong Arm 5 drill clamp best are DeWalt and Ridgid but many others are possible. If you are using a drill that has a larger band, or a cordless or pneumatic drill, then you will need an optional Drill Chuck Adapter.

Recommended part #'s:

DeWalt , model # DW235G

DeWalt , model # D25023K Rotary Hammer

Bosch, Bulldog Rotary Hammer
